

LED LINEAR HIGH BAY WITH Q-BASE

STANDARD series

DESIGN: LED LINEAR HIGH BAY WITH Q-BASE STANDARD SERIES is a standard efficiency 170lm/W output. It has a built-in Q-base, allowing you to install the microwave motion or PIR sensor. Die-cast aluminum housing with excellent heat dissipation along with an anti-glare PC lens provide many years of use. Surge protection 6kV protects the fixture from voltage spikes and current surges.

VARIETY: Fixture is designed to operate on 120-277V or 200-480V circuits.

COLOR AND POWER SELECTABLE: You can choose either a 3500K neutral white, 4000K cool white or 5000K daylight color temperature, and change the power with a simple switch.

INSTALLATION: This fixture supports three different mounting styles: a suspended setup for a floating appearance, a surface-mounted option for a flush fit, and a pendant-style installation for a stylish, hanging effect.

ADVANTAGES: With calculated lifespan up to 167 000 hours, these fixtures are made to last decades under normal operation! ASD provides a 5-year limited warranty along with UL and DLC Premium certifications to guarantee top quality products and safety!

OPTIONS:

Models with battery back-up. The built-in battery back-up provide 90 minutes of power in case of emergency.

Model with 10ft cord with NEMA L7-15P PLUG. This fixture includes a 10-foot cord with NEMA L7-15 plug, which allows for quick and easy installation.

INSTALLATION GUIDE

Please read all the instructions below before installation!

IMPORTANT SAFETY INFORMATION

- Make sure that the supply voltage corresponds to the rated product voltage.
- The product must be installed by a qualified electrician in accordance with the National Electrical Code and corresponding local codes.
- If the product is damaged, do not use it.

⚠ WARNING

Risk of personal injury: read and follow all warnings and installation instructions. Keep or give to the owner for future reference.

Risk of cuts: Wear gloves to prevent cuts or abrasions when removing from carton, handling, installing, and maintaining this product.

Risk of electric shock: This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

Risk of Fire: Minimum 194°F supply conductors. Consult a qualified electrician to ensure correct branch circuit conductor.

ASD® assumes no responsibility for claims arising out of improper or careless installation or handling of this product.

PACKAGE CONTENTS

DESCRIPTION	QUANTITY
LED Linear High Bay with Q-Base	1
Hanging kit: V hook, chain 3.2 ft (A)	1
Box	1

SURFACE MOUNT INSTALLATION

sold separately

ASD-SMB1-WHB5

- Secure the brackets to ceiling, beam, joist or rail (bolts not included).
- Connect the wires: Black to Black, White to White, Green to Green.
- Attach the fixture to the bracket and secure with one screw per each side of the bracket.

POWER AND COLOR TEMPERATURE SETTINGS

INSTALLATION STEPS

- Insert V-hooks into both ends of the fixture. Secure chain to ceiling, beam or other mounting surface.
- Unscrew and open backplate, use screwdriver to open one knockout.
- Connect the wires: Black to Black, White to White, Green to Green. If you are not using the dimming wires cap them off but not together. Reattach knockout plate to top of the fixture and secure with screw.

PENDANT MOUNT INSTALLATION

sold separately

ASD-PMB1-WHB5

- Assemble metal hose with connectors and attach bracket's side plate to one side. Install the bracket on 3/4" NPT pipe. Bracket does not include nuts or screws for mounting to surface.
- Unscrew and take off fixture's backplate, open one knockout using screwdriver. Then attach backplate to free end of the metal hose. Attach the bracket by putting the bracket's hooks into the slots in the center of the housing. Secure the bracket with screws. Connect the wires: Black to Black, White to White, Green to Green.
- Reattach the backplate in its place and secure with screw. Align the studs of the side plate with the slots in the housing, place the side plates, and secure them with screws.

MOTION SENSOR INSTALLATION

sold separately

ASD-09MW

ASD-09IR

ASD-09IR50

- Unscrew the microwave sensor base cap.
- Insert and twist the sensor until it is tight on the base surface.

INFRARED MOTION SENSOR ASD-09IR

SENSITIVITY	0°/360°	45°	90°	135°	180°	225°	270°	315°
100% 12m	6.5	5.5	6.5	5	6	5	7	5.5

SENSOR USAGE RECOMMENDATIONS

INDOOR RECOMMENDED LOCATIONS
Places where the temperature of the environment is well controlled.
Places where detecting the movement of people is a high priority.

INDOOR NOT RECOMMENDED LOCATIONS
Places where environment temp close to human body.
Places where PIR sensor lens can get covered.
Places higher than 39ft (unless you use 50ft PIR).

INFRARED MOTION SENSOR ASD-09IR50

SENSITIVITY	0°/360°	45°	90°	135°	180°	225°	270°	315°
100% 12m	6.5	5.5	6.5	5	6	5	7	5.5

REMOTE CONTROL ASD-06RC sold separately

- ON/OFF** ON/OFF
Enter on / turn off
- SCENES** SCENES
Shows current settings saved in remote
- APPLY** APPLY
Applies current scene settings to the fixture
- DETECTION RANGE** DETECTION RANGE
Also known as "sensitivity", 100 % means the highest sensitivity and longest distance. Use this button and the +/- buttons to adjust
- HOLD TIME** HOLD TIME
The period that light will stay illuminated 100 % after no motion is detected. Use this button and the +/- buttons to adjust
- CCT SELECTABLE** CCT
Not applicable to this product
- RESERVED BUTTON** RESERVED BUTTON
Not applicable to this product

- AUTO** AUTO
Enter "sensor mode" and perform previous settings
- START** START
Press this to begin scene setup
- M H** MOUNTING HEIGHT
Adjust detection area/sensitivity levels according to real installation situations, higher or lower
- DAYLIGHT SENSOR** DAYLIGHT SENSOR
The preset lux level at which motion will be detected. Use this button and the +/- buttons to adjust
- UP** UP
The main functional buttons to adjust the factors to desired level. Press +/- button to dim light directly Auto in non-detection mode
- DOWN** DOWN
The main functional buttons to adjust the factors to desired level. Press +/- button to dim light directly Auto in non-detection mode
- DAYLIGHT HARVESTING** DAYLIGHT HARVESTING
Daylight harvesting function enabled or disabled

- RESET** RESET
Enter "sensor mode" and perform the default settings
- MEMORY** MEMORY
Saves the scene settings
- SEND** SEND
Memorize and send out the previous setting of individual parameters
- STAND-BY DIMMING** STAND-BY DIMMING
After hold time, the light will dim from 100 % to optional standby dimming levels. Use this button and the +/- buttons to adjust
- STAND-BY PERIOD** STAND-BY PERIOD
The period after holdtime, during which the light keeps standby dimming level. Use this button and the +/- buttons to adjust
- POWER** POWER
Adjust brightness in both ON/OFF mode & sensor mode, minimum 10%, max 100%, each time this button is pressed it changes by 5%
- TEST** TEST BUTTON
Press this button to test the sensor; it will temporarily change the hold time to 2s. This setting cannot be saved

WITH DUSK TO DAWN FUNCTION

1. With insufficient ambient brightness, sensor turns on light and keeps it at standby dimming level even if there is no motion or presence.
2. When sensor detects motion or presence it will bring the light level up to 100 %.
3. After motion is no longer detected, fixture remains at 100 % for hold time.
4. After the preset hold time period, it will dim to the standby dimming level and maintain it indefinitely.
5. With sufficient ambient brightness, sensor will turn OFF light automatically.

WITH DAYLIGHT DISABLED

1. Sensor turns ON light when motion is detected.
2. Light will stay on after detecting motion for the desired hold time.
3. Sensor dims light to standby dimming level after hold time if there is still no motion.
4. Sensor turns OFF light after standby period.

WITH DAYLIGHT THRESHOLD

1. With sufficient daylight, the light remains OFF even after motion is detected.
2. With insufficient daylight, the sensor turns light ON when motion is detected.
3. After there's no motion detected, the sensor keeps light ON 100 % for holdtime.
4. After holdtime, sensor dims light to standby dimming level for standby period. If the standby period has been set as 0s, sensor turns light OFF automatically after holdtime.
5. The sensor turns OFF light automatically after the standby period when there's no motion detected.

DAYLIGHT HARVESTING

1. When the ambient brightness is lower than the preset lux level, the sensor will automatically turn on the light and adjust the dimming according to changes in ambient brightness. As it gets darker outside, the fixtures will brighten, and as it gets brighter outside, the fixtures will dim.
2. When the ambient brightness exceeds the preset lux level, the light will turn OFF.

MICROWAVE MOTION SENSOR

To avoid blocking the microwave emission, the microwave sensor can not be covered with metal materials, be sprayed with a coating of metal components, or have attached metal material or stickers etc.

The distance between the antenna and the glass (dielectric material) should be no less than 0.4 ft when the sensor is within the glass lampshade. Otherwise, the microwave motion sensor will not penetrate the glass easily.

Avoid placing the sensor inside a metal chamber, this may cause ais-trigger.

The sensor should not be placed in a small confined space. To avoid increasing the sensor detection range or abnormal operation, the sensor should be kept away from large areas of metal and glass reflectors (separation distance at least 3.3 ft). Reduce the detection area setting.

To avoid affecting the microwave signal transmission, the microwave antenna should be higher than the surrounding metal surface.

Any vibration or movement may trigger the sensor. Ensure the sensor is far from any constant movement.

At least 2 m/6.5 ft distance between microwave sensors;

1.5 m/4.9 ft between the sensor and other wireless devices such as routers to avoid possible radio interference.

DAYLIGHT HARVESTING SETTING

1. Adjust "daylight" value higher than 50lux.
2. Preset "standby period" 0S.
3. Press "daylight harvesting" button on remote control to activate.

BACK-UP BATTERY KIT INFORMATION

Self-check emergency battery back-up kit offers a dependable solution for virtually every LED Linear High Bay lighting application, with options tailored for both new fixture constructions and field installation applications.

CAUTION

- Before performing a high-voltage insulation test, ensure the battery pack is removed and that there is no contact between the battery pack and the LED drivers.
- After testing, disconnect the battery pack unit connector before shipping and storing.
- During storage, the battery pack will need 24 hours of charging every 3 months.

WHB5B-ST with battery back-up kit (100-320W)

WHB5B-ST with battery back-up kit (500W)

INSTALLATION STEPS

1. Mount the Battery Back-up Kit:

Open the battery back-up kit. Remove one top and one side knockout from the driver box. Attach the battery back-up kit to the driver box using 4 screws.

2. Install the Test Button:

Open the fixture driver box. Install the battery back-up button into the side knockout and secure it with the included washer. Route the button wire into the battery back-up kit and connect it to the battery controller.

3. Connect Battery Back-up to Fixture Wiring:

- Red (DRIVER +) to Red (Driver output +);
- Black (LED-/DRIVER -) to Black (Driver output -), Led1 (-), and Led2 (-) using one connector;
- White (LED +) to Led1 (+) and Led2 (+) using one connector.

4. Connect Power and Close:

Pull White (N), Black (L), Green (G), Pink (Dim-), and Violet (Dim+) into the battery back-up kit. Connect matching colors (Black to Black, White to White, Green to Green) per the wiring diagram. Use the included white extension wire if needed. Connect Pink (Dim-) and Violet (Dim+) to the dimmer if required. Reattach the driver box cover and secure with screws.
