

ENDEAVOUR 2.0

LINEAR HIGH BAY

PRODUCT
OVERVIEW

SCAN OR
CLICK HERE

FEATURES

- Sleek, lightweight fixture with curved injection-molded end caps for aesthetic appeal and easy installation toolless access into the housing
- High efficiencies (up to 164 LPW) that translate into a low life cycle cost
- Offers lumen outputs up to 100,000 to accommodate various ceiling heights, fixture spacings, and application requirements
- Designed for ambient temperature settings from -40°F up to 131°F with High Temperature Options up to 149°F
- Efficient 1-for-1 replacement of linear fluorescent & HID fixtures that is configurable to current site requirements offering 17 different lumen and size configurations
- Precision designed optical performance in both wide and narrow distributions
- Uplight Options to optimize full room illumination

SUITABLE APPLICATIONS

- Gymnasium
- Hangar
- Manufacturing
- Retail
- Warehouse
- Government Facilities
- Distribution Centers
- Auto Service Bays/Lanes

CERTIFICATIONS

SPECIFICATIONS

CONSTRUCTION

Aluminum body with steel driver channel for maximum rigidity and thermal properties. Sleek curved polycarbonate injection molded end caps provide a modern finish while adding rigidity and durability. Toolless hinged driver door access for ease of maintenance and installation. Power access plate mounted on back of center driver channel for easy access to wiring. Product proudly assembled in the United States of America.

MOUNTING

Options include suspension chain, aircraft cables, hook, single pendant (HUB), surface mount (SMZB KIT EDV). Reduced maximum ambient range for surface mount.

UPLIGHT OPTION

Offers an additional layer of lighting to optimize full room illumination by reducing the contrast between the luminaire and the ceiling, eliminating the "cave" effect. With a dedicated individual switchable 0-10V (10%) dimmable driver and 2 linear strips of LED boards, the modules are encapsulated with a frosted polycarbonate lens. Optional uplight wired to sensor if ordered together.

Uplight Option Modules

ELECTRICAL

Class 2 LED light engine for high efficacy and long life. Calculated L70 > 100,000 hrs. LED Lumen Maintenance Estimates based on TM-21 projections for the light source at 25°C ambient. Power Factor > 0.90. THD < 20%. Standard 120-277 Vac 0-10V dimmable (10%-100%) with optional 347-480 Vac step down transformer. Optional emergency battery backups and generator transfer device available to meet critical life safety lighting requirements.

OPTICS

Standard without lens. Optional frosted acrylic (FRL) and frosted polycarbonate (PFL) lenses available for added LED protection and glare reduction. Both optics are IP5X rated; protected against dust intrusion. Frosted Polycarbonate lens (PFL) is IK10 impact rated; highest impact rating available. Wide (std.) & Narrow (ND) Distribution options available for all lumen packages.

THERMAL

Standard ambient temperature range -40°F up to 131°F (-40°C to 55°C). Optional high ambient temperature range -40°F up to 149°F (-40°C to 65°C). Fixture to be mounted at a minimum plenum height of 18" to maintain maximum ambient temperature. Reduced maximum ambient for surface mounting, emergency battery backup, and step down transformers; see ambient temperature table on page 6 for more details

CONTROLS

Factory installed Advanced and Basic integral occupancy sensor options available. All Basic sensors are end mounted. Advanced EasySense sensor is end mounted. All other Advanced sensors are center driver cover mounted. Inquire with manufacturer for additional controls options, including customer supplied items.

CERTIFICATIONS

ETL listed to US and Canadian safety standards. Suitable for damp locations. American Recovery and Reinvestment Act Funding Compliant. Please refer to the DLC (DesignLights Consortium) Qualified Products List at www.designlights.org/QPL to confirm specific product qualifications.

WARRANTY

5 Year Warranty Standard; 10 Year Warranty Optional ([Terms and Conditions apply](#)).

FOOTNOTES

¹ Reduces published performance by 16%

² Consult Factory for Pricing & Availability

³ Reference High Temperature Ratings by lumen package on page 4

⁴ Not available with EM, SD, UP, BLK, or RALxxxx Options

⁵ Consult Factory for more details

⁶ Cannot be used w/ FMB or SMZB options

⁷ Mounted externally to fixture

⁸ Sensor Mounted off end cap of fixture

⁹ Operation down to 14°F

¹⁰ Sensor Mounted on center drive channel

¹¹ Requires bluetooth enabled device for programming (provided by others)

¹² Operation down to -30°F

¹³ Operation down to 32°F

¹⁴ Requires Site Layout, Consult Factory

¹⁵ High Temp (HT) sensor options limited to FIOS or FSP311/Lx Sensor selections

¹⁶ May require aircraft cables to achieve balance for specific configurations. Consult factory

¹⁷ Not compatible with Hook or Hub when ordered with 100L

¹⁸ Consult factory for 100L configuration

¹⁷ Not compatible with Hook or Hub when ordered with 100L

¹⁸ Consult factory for 100L configuration

¹⁹ Reduces Max Ambient; Consult factory

²⁰ Only available with EDV2-8L to 24L and EDV4-12L to 30L

²¹ Reduces Max Ambient; Consult factory

²² Consult Factory quote for RELOC OCU, OCS, OD System Drops; System Drops Sold & Shipped Separately; Retrofit Applications Only

²³ Disconnect the TSPL before unplugging the RRL so it does not go into discharge mode. Requires fixture to have battery option.

²⁴ Only available with EDV2-8L to 24L and EDV4-12L to 30L

CONTROLS OPTIONS

BASIC

FIOS

Standard on/off motion sensor. Comes with 360 degree high bay lens, 360 degree low bay lens & aisle lens. 360 degree high bay lens factory installed, unless notified otherwise. Sensor mounted off end cap of fixture. Inquire for mounting on center of driver cover.

FIOSPC

Motion sensor with the addition of photocell control. When installed, fixture will not activate unless 1. motion is detected and 2. light levels are below the preset level. When activated, fixture will turn on to 100% light output & will only shut off when one of the two levels mentioned above are met. If no motion is detected & light levels fall below preset level the fixture remains off. Sensor mounted off end cap of fixture.

FIOSPC/DLH

Factory installed motion sensor with the addition of photocell control that will allow for daylight harvesting. When installed, fixture will not activate unless 1. motion is detected & 2. light levels are below the preset level. When activated, fixture will turn on only enough to meet the preset light levels and will adjust as the amount of light in the space adjusts between 100%-10%. If light levels are adequate the fixture will remain off. Sensor mounted off end cap of fixture.

CLOS

Standard on/off motion sensor. Comes with 360 degree high bay lens, 360 degree low bay lens & aisle lens. 360 degree high bay lens factory installed, unless notified otherwise. Sensor mounted off end cap of fixture. For cold storage down to -40°C (-40°F). Inquire for mounting on center of driver cover.

DHPC

Daylight Harvesting off photocell. Fixtures will continually dim up/down throughout the day based on light level readings taken from the photocell control. Sensor mounted off end cap of fixture.

USBD

User Selectable Bi-Level Dimming. Allows the end user to manually select the unoccupied dimming level. Once motion is detected, the fixture will return to 100% light output. Sensor mounted off end cap of fixture.

BDxx

Factory set Bi-Level Dimming. Sensor is set to dim level, as indicated in the "xx" portion of the part number, when the area is unoccupied. Example: BD20 sets the fixture to dim down to 20% lumen output when the area is unoccupied. Once motion is detected, the fixture will return to 100% light output. Sensor mounted off end cap of fixture.

BDxxPC

Factory set Bi-Level Dimming with motion and photocell. Sensor is set to dim level, as indicated in the "xx" portion of the part number, when the area is unoccupied and will not return to 100% light output unless 1. motion is detected and 2. the light level is below the preset level. Example: BD20PC sets the fixture to dim down to 20% lumen output when the area is unoccupied and will not return to 100% light output unless the above conditions are met for both motion and light level readings. Sensor mounted off end cap of fixture.

CONTROLS OPTIONS

ADVANCED

NUROAir by ILLUMUS

NURO

NUROAir Plug n Play Bluetooth Sensor is the optimal groupable controls lighting solution. With main features such as Plug and Play, PIR Motion Sensing, Occupancy/Vacancy and Daylight Harvesting (WHT) - this flexibility makes the NUROAir Plug n Play Sensor ideal for tailoring lighting to specific space needs, optimizing both ambiance and efficiency. The NUROAir App, available for download on iOS and Google Play Store, offers a user-friendly interface for automatic or manual customization of your space. Through the app, users can configure sensor settings such as the Light Output, CCT, Hold Time, Standby Time/Level, High/Low End Trim, Background Light Level, Set Schedules, and Control Lighting Groups or Zones, all from a mobile or tablet device. Manual control is also available with a range of compatible wireless & wired wall switch options.

NUROAir Bluetooth Controls

Philips ESMC/HB

EasySense sensor combines occupancy sensing, daylight harvesting and institutional tuning in one compact solution. This is an ideal control for any high bay application. Each device allows you to turn on/off occupancy and/or daylight harvesting functions as well as set the full light output, background light level, occupancy prolong time, occupancy grace fading time & occupancy time out/hold time. Easily Controlled via Mobile Phone with Philips MasterConnect Bluetooth App. (Sold separately). Sensor mounted off end cap of fixture.

Synapse (SYN or SYNS/Lx)

Utilizing a robust 2.4 GHz Self-Healing Mesh Network, Synapse provides flexibility and scalability making it a perfect solution for both new construction and retrofit projects. The easy-to-use web application is accessible on any device with an internet connection and allows for complete customization of the system and its features. Integral radio (SYN) with optional Wattstopper sensor (SYNS/Lx). Sensors available in 20' or 40' mounting lenses. Consult factory for coverage patterns. Sensor mounted on hinged driver cover. Antenna exits luminaire for maximum connectivity.

Legrand FSP-311

FSP-311 offers fully adjustable high and low dimmed light levels with optional photocell. Hold off setpoint with automatic calibration option. Adjustable time delay and cut off delay. Sensor adjustable programming via iOS® or Android® 'Sensor Configuration' App. Sensor mounted on center driver channel.

Lutron AWRN

Athena wireless node is a radio frequency (RF) device that enables simple, digital control of individual light fixtures in an Athena control system. Enables individual wireless control of each fixture in an Athena control system. Accommodates zone and control changes without rewiring. All drivers on the link are controlled as a single zone. Provided with factory installed components only. Lutron Athena system provided by others.

OPTIONS

Cx/yW

Cords - (x = 6, 10, 15, 20 (ft)) (y = conductors; 3, 4, 5, 6) Plug options available

QDx/yW

Quick Disconnect - (x = 6, 10, 15, 20 (ft)) (y = conductors; 3, 4, 5, 6)

WC

11 GA Wire Cage

FMB

Includes rigid box to attach to the fixture, provides for single point mounting to accept a hook or conduit hub

ACxY

Includes 2 adjustable cable hangers.
Available in 5' or 10'

SMZB KIT EDV

Surface Mount Bracket Kit provides a 2" space above the fixture

LINE DRAWINGS

2 FT SMALL 8L - 24L

2 FT LARGE 30L - 36L

4 FT SMALL 12L - 30L

4 FT LARGE 36L - 100L

PHOTOMETRIC DATA

LUMINAIRE DATA

Part Number	EDV2-24L-U-50
Description	Endeavor 2ft High Bay, 24000lm, without lens
Fixture Lumens (lm)	25,255 lm
Wattage (W)	163 W
Efficacy (lm/W)	155 lm/W
Mounting	Pendant
Spacing Criteria	0° = 1.28, 90° = 1.29

ZONAL LUMEN SUMMARY

Zone	Lumens (lm)	% Fixture
0° - 40°	12,031	48%
0° - 60°	21,187	84%
0° - 90°	25,255	100%
90° - 180°	0	0%
0° - 180°	25,255	100%
