FEATURES & SPECIFICATIONS

CONSTRUCTION

- **Extruded Aluminum Heat Sinks:** provide optimal thermal management by decreasing LED junction temperature, ensuring longer life and higher efficacy. LED boards attached to the heat sink using a high quality thermally conductive adhesive rather than screws or rivets. This ensures good contact between PCB and heat sinks for excellent thermal conductivity.
- **LED Boards:** FR4 PCB to limit the stress on solder joints by closely matching the coefficient of thermal expansion between LEDs and the PCB.
- **Power Supply Access:** Wireway cover allows easy access and quick wiring. Hole accepting 3/4" stem (not centered). If center stem mount is required, select STEM in mounting options.
- **Wire Guards:** Optional factory-installed wire guards for the fixture.
- **EZ-Connect™ Receptacle:** The simplest and fastest way to add sensors and wireless controls at any time on the field. Twist and Lock system, no tools or wiring needed.

ELECTRICAL

- **Power Input:** 120-277V or 277-480 (50/60Hz) typical.
- **Power Factor:** Greater than 0.9 (0.96-0.99 typical).
- **Total Harmonic Distortion:** <10%.
- **Surge Protection:** Standard is 6kV for drivers. Additional surge protection available as an option. All HV orders will have SRG option automatically added (contact sales for questions).
- **Emergency Battery Backup⁶:** EM16 has 16 watts output and produces ~2,700 lumens for 90 minutes (available for LV only). EM25 has 25 watts output and produces ~4,300 lumens for 90 minutes (available for LV and HV). Factory installation only, not able to be field installed.

OPERATION

- **Environment:** Dry/Damp, for interior applications (IP3X). Dust-resistant LED modules.
- **Ambient Range Operation^{5,6,7}:** -40°C up to 55°C (-40°F up to 130°F).

OPTICS

- **CCT:** 3500K, 4000K and 5000K standard. Other CCTs available upon request (extended lead time).
- **CRI:** 80+ standard, 85 typical.
- **Lenses:** Clear, Aisle, Narrow (UV stable polycarbonate) and Frosted (acrylic PMMA). Lenses are field-replaceable.

MOUNTING

- **Mounting:** Fixture is cable ready (CRM). Other options are STEM (comes with a 3/4" opening in the center of the STEM box), HOOK and surface mount (with optional MBR). MBR reduces ambient range by 5°C when mounted flush to junction box.

CONTROLS^{1,2,3}

- **Dimming:** 0-10V standard. Dimming range 100% to 10%, then Off.
- **Occupancy Sensors:** PIR and Microwave occupancy sensors, On/Off/Dim. EZ-Connect™ Twist Lock system for field installation.
- **Networked Lighting Controls:** UltraLink Wireless Controls with Bluetooth® NLC Mesh technology. EZ-Connect™ Twist Lock system for field installation.

WARRANTY

- **10 Year Performance Warranty:** Fixture is guaranteed for 10 years, including lumen maintenance (L70), color temperature, and LED driver. "Defective" is considered if ten percent (10%) or more of the LEDs, per product, are non-operating LEDs, total lumen depreciation exceeds 30% (L70), or color temperature has shifted more than 500° Kelvin within the warranty period. See terms and conditions at <https://linmoreled.com/warranty>

FOOTNOTES

1. The performance of sensors and lenses is influenced by various factors beyond Linmore LED's control, including but not limited to environmental conditions, user settings, and proper maintenance. While we provide detailed specifications and guidelines to help optimize performance, we cannot guarantee or be held liable for the performance of sensors or lenses under any particular circumstance(s). Customers are advised to test the products in their specific application environments to ensure suitability for their intended use and are responsible for all sensor and lens selections.
2. Linmore LED recommends all fixtures equipped with controls and/or sensors should be ordered with SRG or SRGOFF option as controls and sensors are not protected by the internal surge suppression provided by the driver.
3. UltraLink controls require commissioning in the field via iOS app. Optional services available. Priced separately. Contact ultrasupport@linmoreled.com for pre-sale, installation, and activation queries.
4. LM-79, LM 80 tests and reports are performed in accordance to IESNA standards, per TM-21. Lumen maintenance in hours (L70 via TM-21) based on 24/7 operation.
5. Temperatures below -20°C have limited switch cycles, consult factory.
6. Fixtures with EM16 or EM25 have a range of operation from 0°C to 45°C (32°F to 113°F). When mounted to the ceiling, EM15 and EM25 max. ambient temp is 35°C. Factory installation only, not able to be field installed.
7. MBR reduces ambient range by 5°C when mounted flush to junction box.
8. 122-277V only.
9. Not DLC listed.
10. All cords are 18/3 AWG and 600V. DW and 15DW are 18/5 and 600V.
11. SRG is optional for all LV fixtures and mandatory (automatically included) for all HV fixtures. It includes a 10kA surge suppression device in which, when triggered, the fixture will fail in the "On" mode (fixture will illuminate).
12. SRGOFF includes a 20kA surge suppression device in which, when triggered, the fixture will fail in the "Off" mode (fixture will not illuminate).
13. Dimensions listed are for the fixture only. See dimensional drawings for measurements with mounting hardware. Weights are approximate and vary by model, if weight is a concern, please contact factory. Weight changes when battery backup or other options are added.
14. Extended lead time may apply.
